

09750923-010201
T02070-EE605460

1 From the foregoing detailed description, it will be evident
2 that there are a number of changes, adaptations and
3 modifications of the present invention which come within the
4 province of those persons having ordinary skill in the art
5 to which the aforementioned invention pertains. However, it
6 is intended that all such variations not departing from the
7 spirit of the invention be considered as within the scope
8 thereof as limited solely by the appended claims.

9

10 The claims are:

11 1. A method of requesting and collecting information
12 from a network via an information account of a system,
13 comprising a plurality of steps of:

14 making a request by indicating a type of information to
15 be collected;

16 entering a duration in which the request is active.

17

18 2. The method of claim 1, further comprising a step
19 of:

20 receiving in the information account a result obtained
21 from the network in response to the request.

22

23 3. The method of claim 1, further comprising a step
24 of:

0975093.010201
FOI# E2605260

1 maintaining a record to capture the request and a
2 result obtained from the network in response to the request.

3

4 4. The method of claim 3, further comprising a step
5 of:

6 determining an amount of result in the record.

7

8 5. The method of claim 3, wherein a utility analyzes
9 behaviors of a requester making the request in view of the
10 record.

11

12 6. The method of claim 1, further comprising a step
13 of:

14 determining an actual duration the request stayed
15 active.

16

17 7. The method of claim 1, further comprising a step
18 of:

19 taking an action based on the result obtained from the
20 network in response to the request.

21

22 8. The method of claim 7, further comprising a step
23 of:

24 categorizing the action taken after receipt of the
25 results.

1

2 9. The method of claim 7, wherein the action is one
3 of made a purchase, not made a purchase, continued to make
4 the request, modified the request, purchased within a time
5 range and abandoned the request.

6

7 10. The method of claim 1, further comprising a step
8 of:

9 inputting one of various levels of readiness to buy and
10 a purchase intentionality index.

11

12 11. The method of claim 1, further comprising a step
13 of:

14 entering one of a usage intentionality index.

15

16 12. The method of claim 11, further comprising a step
17 of:

18 determining whether to issue one of an electronic
19 refund and a coupon voucher based on one of the purchase
20 intentionality status, the purchased intentionality index
21 and the usage intentionality index.

22

23 13. The method of claim 1, further comprising a step
24 of:

1 specifying one of a destination and a plurality of
2 destinations regarding where a result of the request is to
3 be delivered to.
4

5 14. The method of claim 1, wherein an origin of where
6 the request is initiated from is insulated from the network.
7

8 15. The method of claim 1, wherein the request
9 comprises a plurality of request parameters.
10

11 16. The method of claim 1, wherein the duration is
12 preset for one of a future activation date and a future cut-
13 off date.
14

15 17. The method of claim 1, further comprising a step
16 of:
17 specifying a time the request is made known to the
18 network.
19

20 18. The method of claim 1, further comprising a step
21 of:
22 entering a quantity of information desired as expressed
23 in one of a fixed number and a range.
24

09750923 010201
T020T0 E2605250

1 19. The method of claim 1, further comprising a step
2 of:
3 entering a preferred method of transmission as
4 expressed in a transmission rate.
5

6 20. The method of claim 1, further comprising a step
7 of:
8 entering a preferred method of transmission suitable
9 for a particular type of receiving terminus.
10

11 21. The method of claim 1, further comprising a step
12 of:
13 entering a geographic region where the type of
14 information is to be collected from.
15

16 22. The method of claim 1, further comprising a step
17 of:
18 specifying a certain promotional type which the type of
19 information is to be collected from.
20

21 23. The method of claim 1, further comprising a step
22 of:
23 specifying a source of origin where the type of
24 information is to be collected from.
25

1 24. The method of claim 1, further comprising a step
2 of:

3 specifying the type of information must be collected
4 from a source accepting a certain transaction method.

5

6 25. The method of claim 1, further comprising a step
7 of:

8 entering a delivery priority of the type of information
9 based on a plurality of terminus.

10

11 26. The method of claim 15, further comprising a step
12 of:

13 ranking a plurality of results based on how close each
14 result matches the plurality of request parameters.

15

16 27. The method of claim 15, further comprising a step
17 of:

18 entering a priority of delivery based on how well a
19 plurality of results matches the specified request
20 parameters.

21

22 28. The method of claim 1, further comprising a step
23 of:

24 specifying a time the type of information should be
25 delivered to the information account.

1

2 29. The method of claim 1, further comprising a step
3 of:

4 specifying a repetitive pattern the type of information
5 should be delivered to the information account.

6

7 30. The method of claim 1, wherein the account
8 comprises an electronic mail (email) account, an instant
9 messaging account, a wireless short messaging account, a
10 wireless account, a cellular telephone account, a paging
11 account, a facsimile number, a voice mailbox, a bulletin
12 board, an addressable TV terminus address, a posting address
13 and a print out address.

14

15 31. The method of claim 1, wherein the type of
16 information is indicated by one of selecting from an index
17 with a mouse, entering from a keyboard and entering orally
18 with a microphone.

19

20 32. The method of claim 1, wherein the type of
21 information is searched from one of a public domain resource
22 and a private domain resource.

23

1 33. The method of claim 1, wherein the duration is
2 measured in one of seconds, minutes, hours, days, weeks,
3 months, years, and a combination thereof.

4

5 34. The method of claim 1, further comprising a step
6 of:

7 entering an update interval of the request.

8

9 35. The method of claim 34, wherein the update
10 interval is measured in one of seconds, minutes, hours,
11 days, weeks, months, years, and a combination thereof.

12

13 36. The method of claim 1, further comprising a step
14 of:

15 specifying a format of a result.

16

17 37. The method of claim 36, wherein the format
18 comprises HTML/PIX, Video, Audio, Text, ASCII, TIFF, JPEG
19 and other formats used in the digital transmission of data.

20

21 38. The method of claim 1, further comprising a step
22 of:

23 specifying whether a related subject of the type of
24 information is desired

25

0975093 01001
T020T0" E2605260

1 39. The method of claim 1, further comprising a step
2 of:
3 specifying whether the search should be conducted in
4 one of a public domain resource, a private domain resource,
5 and a combination thereof.

6
7 40. The method of claim 39, further comprising a step
8 of:
9 taking payment information from a requester via one of
10 a micro-payment system, billing or credit card system.

11
12 41. The method of claim 1, further comprising a step
13 of:
14 receiving a result of the requested type of information
15 in the account in a specified format at a specified update
16 interval within the duration the request is active, in a
17 quantity desired and according to a priority and a
18 preference.

19
20 42. The method of claim 1, wherein the method is
21 implemented on one of an instant messaging utility, a
22 wireless messaging utility (WAP or other), an electronic
23 mail utility, a paging utility, a facsimile utility, a voice
24 mail utility, a bulletin board utility, a printer utility, a
25 browser utility, a cable utility, a satellite utility, a

1 digital broadcast utility, a television system utility, a
2 web-TV utility and an Internet utility.

3

4 43. The method of claim 1, wherein the request is
5 transmitted via one of a 2-way addressable television
6 system, or a hybrid system where download is via a broadband
7 signal and upload is via telephone, a cable system, an
8 Internet system, an Intranet system, a satellite system, a
9 Web-TV system and a digital broadcast system, a local area
10 network and a wide area network.

11

12 44. The method of claim 1, wherein the method is
13 implemented on a computer system in one of an always active
14 mode and a launched upon request mode.

15

16 45. The method of claim 1, wherein the method is
17 integrated as a request utility as part of one of a web site
18 and a portal.

19

20 46. The method of claim 1, wherein a requester's
21 identity is concealed from an origin providing a result
22 relevant to the request.

23

24 47. The method of claim 1, further comprising a step
25 of:

1 designating automatic forwarding of requested
2 informational/advertising e-mails to one of a single party,
3 a plurality of parties, an existing carbon copy (cc) list,
4 and a newly created distribution list of e-mail recipients.
5

6 48. The method of claim 1, further comprising a step
7 of:

8 paying for a result relevant to the request by one of a
9 micro-payment, billing, and credit card system.
10

11 49. The method of claim 1, wherein the system captures
12 a requester behavior with respect to a result delivered to
13 the requester.
14

15 50. The method of claim 49, wherein the requester
16 behavior comprises opening the result, saving the result,
17 deleting the result, forwarding the result, responding to
18 the result, making a purchase transaction via email in
19 response to the result, registering for any offer in
20 response to the result and archiving the result.
21

22 51. The method of claim 1, wherein should the request
23 fail to specify any preferences or request criteria, default
24 preferences or request criteria are imposed by the system.
25

1 52. The method of claim 51, wherein the default
2 preferences or request criteria are based on one of an
3 average preferences or request criteria of the account in
4 the type of information, an average preferences or request
5 criteria of the overall account, an average preferences or
6 request criteria of the system in the type of information,
7 and an average preferences or request criteria of the
8 overall system.

9
10 53. The method of claim 1, wherein a result of the
11 request can only reach the account with one of a digital
12 key, a certificate for permitted access and a password
13 recognized by a lookup table.

14
15 54. A communication system, comprising:
16 a subscriber system;
17 a supplier system;
18 an information memory system;
19 an information exchange system;
20 a clearinghouse system; and
21 a network;
22 wherein the subscriber system, the supplier system, the
23 information memory system, the information exchange system;
24 the clearinghouse system are interconnected through the
25 network.

55. The communication system of claim 54, wherein data of the system are intercommunicated among the subscriber system, the supplier system, the information memory system, the information exchange system, the clearinghouse system and the network.

56. The communication system of claim 54, wherein a subscriber account communicatively connected to the subscriber system makes a request of information having a specified characteristic to the subscriber system.

57. The communication system of claim 56, wherein a supplier account communicatively connected to the supplier system provides a supply of information having an indicated characteristic.

58. The communication system of claim 57, wherein the information exchange system upon finding a match between the specified characteristic and the indicated characteristic, causes the communication system to transfer the supplied information to the subscriber account.

1 59. The communication system of claim 58, wherein the
2 information exchange system informs the clearinghouse system
3 that the request of information has been fulfilled.
4

5 60. The communication system of claim 59, wherein the
6 clearinghouse system registers a charge against the
7 subscriber account.
8

9 61. The communication system of claim 54, wherein the
10 network is one of a local area network, a wide area network
11 or an Internet.
12

13 62. The communication system of claim 58, wherein the
14 match is one of an exact match and a varying degree of
15 match.
16

17 63. The communication system of claim 56, wherein the
18 request of information having the specified characteristic
19 is communicated to a plurality of supplier correspondingly
20 having a plurality of supplier accounts communicatively
21 connected to the supplier system.
22

23 64. A communication system, comprising:
24 a dynamic request data system is communicatively
25 connected to an Internet;

09750923 010201
T020T0" E2605460

1 an information control panel is communicatively
2 connected to the dynamic request data system;
3 an email account is communicatively connected to the
4 dynamic request data system;
5 an information supplier system is communicatively
6 connected to the dynamic request data system;
7 wherein the dynamic request data system upon receiving
8 a request via the information control panel, initiates a
9 search in one of the internet and the information supplier
10 system and delivers information fulfilling the request to
11 the email account.
